

ID	name	score	surgery/0	occurrence/0	occurrence/1	severity	surgery/1
1	Subconjunctival haemorrhage	1	General	Intra-operative	Post-operative	Mild	
2	Chemosis	1	General	Intra-operative	Post-operative	Mild	
3	Subretinal haemorrhage not involving macula, ≤ 1 quadrant	3	General	Intra-operative		Mild	
4	Subretinal haemorrhage not involving macula, > 1 quadrant	4	General	Intra-operative		Mild	
5	Suprachoroidal haemorrhage not involving macula and no kissing	5	General	Intra-operative	Post-operative	Moderate	
6	Subretinal haemorrhage involving macula, ≤ 3 disc areas	7	General	Intra-operative		Moderate	
7	Subretinal haemorrhage involving macula, > 3 disc areas	8	General	Intra-operative		Severe	
8	Suprachoroidal haemorrhage involving macula or kissing	9	General	Intra-operative	Post-operative	Severe	
9	Refractive changes: <2D	2	General	Post-operative		Mild	
10	Early raised IOP, self-resolving	2	General	Post-operative		Mild	
11	Early hypotony, self-resolving	2	General	Post-operative		Mild	
12	Serous choroidal detachment: peripheral	3	General	Post-operative		Mild	
13	Persistent localised subretinal fluid: peripheral, non-progressive	3	General	Post-operative		Mild	
14	Visual field loss not related to retinal detachment but attributable to surgical procedure: Not affecting driving license	4	General	Post-operative		Mild	
15	Refractive changes: ≥ 2D	4	General	Post-operative		Mild	
16	Persistently raised IOP manageable with drops	4	General	Post-operative		Mild	
17	IOL displacement	4	General	Post-operative		Mild	
18	Macular oedema	4	General	Post-operative		Mild	
19	Persistent localised subretinal fluid: submacular	5	General	Post-operative		Moderate	
20	Loss of visual acuity attributable to surgical procedure: Moderate (3-5 lines ETDRS chart)	6	General	Post-operative		Moderate	
21	Persistent hypotony (IOP < 5mmHg) without macular folds	6	General	Post-operative		Moderate	
22	IOL dislocation	6	General	Post-operative		Moderate	
23	Macular hole formation	6	General	Post-operative		Moderate	
24	Visual field loss not related to retinal detachment but attributable to surgical procedure: Affecting driving license	7	General	Post-operative		Moderate	
25	Corneal decompensation / severe corneal oedema	7	General	Post-operative		Moderate	
26	Persistently raised IOP requiring surgery	7	General	Post-operative		Moderate	
27	Serous choroidal detachment: large, kissing	7	General	Post-operative		Moderate	
28	Retinal re-detachment due to new or worsening PVR	7	General	Post-operative		Moderate	
29	Loss of visual acuity attributable to surgical procedure: Severe (≥ 6 lines on ETDRS chart)	8	General	Post-operative		Severe	
30	Persistent hypotony with macular folds	8	General	Post-operative		Severe	
31	Endophthalmitis	9	General	Post-operative		Severe	
32	Sympathetic ophthalmia	9	General	Post-operative		Severe	
33	Phthisis	9	General	Post-operative		Severe	
34	Unintended enlargement of sclerotomy	2	Pars Plana Vitrectomy	Intra-operative		Mild	
35	Leaking ports at the end of surgery requiring suturing	2	Pars Plana Vitrectomy	Intra-operative		Mild	
36	Small bubble formation when inserting PFCL	2	Pars Plana Vitrectomy	Intra-operative		Mild	
37	Cataract development intra-operatively (due to lens touch): Without capsular breach	4	Pars Plana Vitrectomy	Intra-operative		Mild	
38	Iatrogenic retinal tears	4	Pars Plana Vitrectomy	Intra-operative		Mild	
39	Suprachoroidal infusion	5	Pars Plana Vitrectomy	Intra-operative		Moderate	
40	Subretinal infusion	5	Pars Plana Vitrectomy	Intra-operative		Moderate	
41	Cataract development intra-operatively (due to lens touch): With capsular breach	5	Pars Plana Vitrectomy	Intra-operative		Moderate	
42	Vitreo-retinal incarceration in sclerotomy	5	Pars Plana Vitrectomy	Intra-operative		Moderate	
43	Intra-operative displacement of perfluorocarbon liquid (PFCL) under the retina	6	Pars Plana Vitrectomy	Intra-operative		Moderate	
44	Anterior displacement of tamponade agent: PFCL	3	Pars Plana Vitrectomy	Post-operative		Mild	
45	Leaky sclerotomy requiring suturing	3	Pars Plana Vitrectomy	Post-operative		Mild	
46	Anterior displacement of tamponade agent: Silicone oil	4	Pars Plana Vitrectomy	Post-operative		Mild	
47	Emulsification of tamponade agents	4	Pars Plana Vitrectomy	Post-operative		Mild	
48	Macular folds: not involving fixation	4	Pars Plana Vitrectomy	Post-operative		Mild	
49	Non-infectious uveitis	4	Pars Plana Vitrectomy	Post-operative		Mild	
50	Incomplete removal of tamponade agent	5	Pars Plana Vitrectomy	Post-operative		Moderate	
51	Retinal slippage	6	Pars Plana Vitrectomy	Post-operative		Moderate	
52	Subfoveal PFCL	7	Pars Plana Vitrectomy	Post-operative		Moderate	
53	Subretinal displacement of silicone oil and heavy silicone oil	7	Pars Plana Vitrectomy	Post-operative		Moderate	
54	Unexplained visual acuity loss associated with insertion / removal of silicone oil	7	Pars Plana Vitrectomy	Post-operative		Moderate	
55	Maculopathy related to light toxicity	7	Pars Plana Vitrectomy	Post-operative		Moderate	

56	Maculopathy related to dye toxicity	7	Pars Plana Vitrectomy	Post-operative	Moderate
57	Macular folds: involving fixation	7	Pars Plana Vitrectomy	Post-operative	Moderate
58	Retinal re-detachment due to new tear formation	7	Pars Plana Vitrectomy	Post-operative	Moderate
59	inadvertent drainage of subretinal fluid	3	Scleral Buckle	Intra-operative	Mild
60	Inadvertent scleral perforation when suturing explant	4	Scleral Buckle	Intra-operative	Mild
61	Air / gas injection behind the lens (pre-anterior hyaloid)	4	Scleral Buckle	Intra-operative	Mild
62	Cataract development intra-operatively (due to lens touch at the time of gas injection): Without capsular breach	4	Scleral Buckle	Intra-operative	Mild
63	Vitreo-retinal incarceration in sclerotomy at time of draining of subretinal fluid	6	Scleral Buckle	Intra-operative	Moderate
64	Sub-retinal injection of air / gas	6	Scleral Buckle	Intra-operative	Moderate
65	Cataract development intra-operatively: With capsular breach	7	Scleral Buckle, pneumatic Retinopexy	Intra-operative	Moderate
66	Delayed exposure of the buckle (after 1 week)	4	Scleral Buckle	Post-operative	Mild
67	Diplopia / strabismus: Corrected with glasses / prisms	4	Scleral Buckle	Post-operative	Mild
68	Early exposure of the buckle (<1 week)	5	Scleral Buckle	Post-operative	Moderate
69	Infection of the buckle	5	Scleral Buckle	Post-operative	Moderate
70	Early migration of the buckle (<1 week)*	5	Scleral Buckle	Post-operative	Moderate
71	Delayed migration of the buckle (after 1 week)	5	Scleral Buckle	Post-operative	Moderate
72	Diplopia / strabismus: Requiring surgery	6	Scleral Buckle	Post-operative	Moderate
73	Fish-egg' gas bubble formation not affecting view of retina	2	Pneumatic Retinopexy	Intra-operative	Mild
74	Fish-egg' gas bubble formation affecting view of retina	4	Pneumatic Retinopexy	Intra-operative	Mild
75	Gas injection behind the lens (pre-anterior hyaloid)	4	Pneumatic Retinopexy	Intra-operative	Mild
76	Cataract development intra-operatively (due to lens touch at the time of gas injection): Without capsular breach	4	Pneumatic Retinopexy	Intra-operative	Mild
77	Sub-retinal injection of gas	6	Pneumatic Retinopexy	Intra-operative	Moderate
78	New retinal tear formation	4	Pneumatic Retinopexy	Post-operative	Mild
79	Retinal re-detachment due to new tear formation	6	Pneumatic Retinopexy	Post-operative	Moderate
